SITUATION SUMMARY

Cal OES Activation Status

State Operations Center	Inland Region EOC	Coastal Region EOC	Southern Region EOC
Level 1	Level 1	Level 1	Level 1

Weather of Concern

Northern California

- Our current ridge of high pressure looks to weaken slightly later this week allowing for some light precipitation to move through extreme Northern California. Beyond that, a ridge will rebuild pushing storms well north of California.

Southern California

- Santa Ana Conditions will weaken by this afternoon, but light offshore winds are expected to persist through tomorrow.
- Northeast winds are expected to gust up to 70 mph across the mountains, Ventura Valleys and Santa Clarita Valley, and up to 50 mph for the coastal and remaining L.A. County valleys.

Active Weather Warnings, Watches and Advisories by County:

Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought
- Humboldt County has submitted a Drought Proclamation Termination Resolution. The situation that resulted from the drought conditions is now deemed to be within control of the County.

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Medford Weather:

It will still be sunny and unseasonably warm again over most inland sections with high temperatures as much as 20 degrees above normal. Temperatures will fall back closer to normal on Wednesday as the ridge axis moves into the great basin and clouds begin to move in. We may see some light rain at the coast by late in the day Wednesday and on into Thursday as well.

Eureka Weather:

Above normal temperatures will continue through the week with a modest cooling trend by Friday. Rain is likely across the north Friday and Friday night no significant additional precipitation is expected through the weekend.

Reno Weather:

High pressure will continue to bring above average temperatures along with generally light winds through the rest of the week. Valley inversions will continue to trap pollutants and may create hazy conditions as well. No precipitation is forecast through the end of the work week, with only small chances possible by weekend.

Sacramento Weather:

There will be dry and mild weather over interior Northern California this week.

San Francisco Weather:

Temperatures will gradually trend cooler through the rest of the week. Outside of a slight chance for rain over the far North Bay Friday and Friday night, dry weather is forecast into at least the start of next week.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Hanford Weather:

High pressure will continue to bring dry weather to the Central California interior for the next several days with patchy night and morning fog in the San Joaquin valley.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

Widespread record high temperatures are possible today. High pressure aloft will weaken through Friday putting an end to the gusty offshore winds and record heat. A fast moving weak upper level low is expected to pass to the North this weekend bringing increased cloudiness and continued seasonably warm conditions.

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

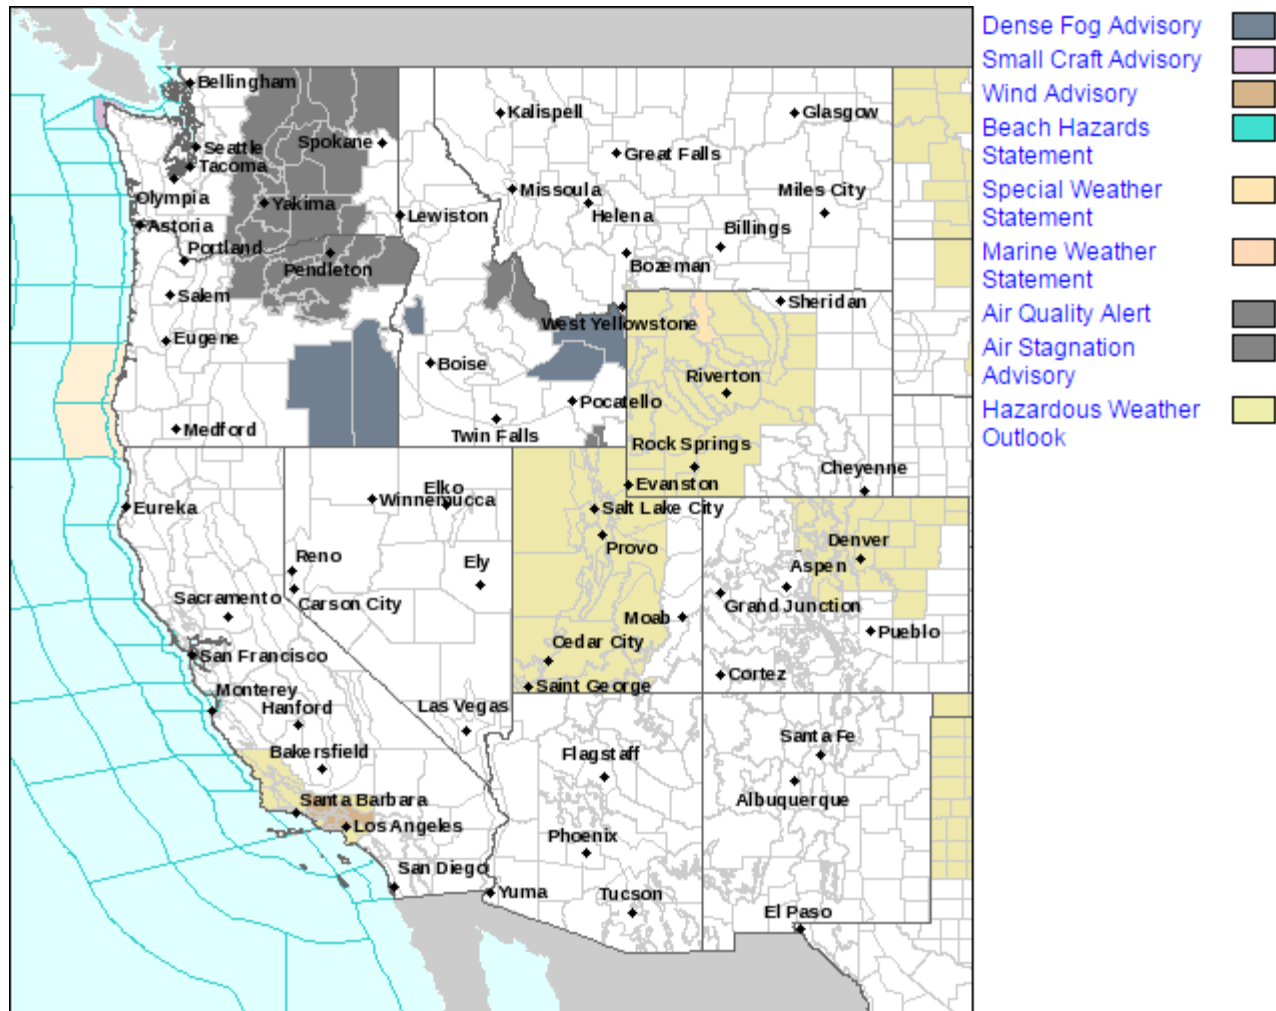

Clear and warm weather will continue this week with high pressure aloft and surface high pressure over the great basin. Less windy but continued well above average temperatures today with possible record highs. For Wednesday through Saturday slow cooling as high pressure aloft weakens then warming for early next week.

Southeast California Weather:

High pressure will remain the dominant weather feature over the Southwestern United States this week. This will result in a prolonged period of sunny skies above normal temperatures relatively light winds and low humidity.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

- The SOC is activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on the first Wednesday of each month.
- Cal OES Recovery/Individual Assistance finalized an updated 2015 version of the drought brochure of programs and services for individuals, businesses, farmers, and ranchers. It has been put on the Governor's Drought webpage. State agencies may put the following link to the brochure on their webpage <http://ca.gov/drought/pdf/Drought-Assistance-Brochure-2015.pdf>
- Cal OES Regions (Inland, Coastal, Southern) collective OA drought call is facilitated by the SOC and will be held once per month.
